

CUBS ENVIRONMENTAL CONSERVATION BADGE

For all Cubs who attended the Environmental Conservation badge evening at our meeting on 13th February, they need to complete **one** of the following to finish the badge:

- Plant a tree or shrub
- Tidy up a piece of land
- Help to look after a garden
- Make a bird feeder or something out of recycled material.

For all Cubs who didn't attend the above meeting, if they want to complete the badge they must do the above requirement **and** all of the following:

- Write six ways in which energy usage can be saved, e.g. not leaving the TV on standby all night.
- Design a poster or slogan to discourage littering. This needs to be on a Post-It sized piece of paper.
- Write about the advantages and disadvantages of THREE types of renewable energy.
- Make a list of which items can get recycled/go into a blue bin and which items cannot.
